

Low Voltage Electrical Wire 100ft 14AWG 2- Conductor Landscape Lighting Cable Direct

MODEL: GG9920-0100-14

Cable length	100ft
Wire gauge	14AWG

Product information

EXTRA LONG 14 AWG WIRE: The long length of the wire allows for greater reach, 100ft length provides more options for routing and positioning the wire, making it possible to achieve a clean and organized installation. The longer wire also minimizes the need for splicing or additional wiring, reducing the complexity of the installation and minimizing potential points of failure

DURABLE: Our electrical wires are encased in a durable PVC jacket that offers protection from UV rays and weathering. Whether buried underground or exposed to outdoor elements, these wires are built to last. With their weather-resistant, these wires can be easily hidden in soil or left exposed to the elements, making them a reliable choice for various outdoor lighting setup

EASY INSTALLATION: The installation of this outdoor landscape cable does not require tools or for you to hire a professional electrician. Simply attach it to your 12V low voltage lighting fixtures without the need for any additional tools or equipment. Enjoy hassle-free and efficient lighting setup for your outdoor space

COMPATIBILITY: Compatible with any 12V low voltage outdoor lighting, for path lights, outdoor spotlights, and garden accent lighting

HIGH STRAND COPPER CORE: The high strand copper core of our electrical wires boasts a low resistance and high efficiency in conducting electricity. This means that our wires are able to transfer electrical signals with low loss, resulting in a more stable and consistent flow of power. Whether you're powering a small device or a large-scale operation, the wire can meet your needs
